Publication No. US20040049809A1

GENERAL INFORMATION:
APPLICANT: Institute de Cincia Aplicada e Tecnologia (ICAT)
APPLICANTION: Pear genes codifying for b-Galactosidase, Pectin Methylesterase,
TITLE OF INVENTION: Polygalacturonase, Expansin and their use.
FILE REFERENCE: none
CURRENT APPLICATION NUMBER: US/10/362,091
CURRENT PILING DATE: 2003-02-12
PRIOR APPLICATION UMBER: PT 102511 C
PRIOR FILING DATE: 2000-08-22
NUMBER OF SEQ ID NOS: 31

a

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

/clone lib="tomato fruit red ripe, TAMU"
/note="Vector: pBlueScript SK(-); Site_1: EcoR1; Site_2:
Khol; supplier: Giovannoni; Fruit were tagged at the
breaker stage (first sign of lycopene accumulation on the
blossom end of the fruit) and harvested 7 days
post-breaker (fully red-ripe), 10 days post breaker, and
20 days post-breaker (over-ripe). 20 day fruit which
showed external or internal signs of pathogenesis were
discarded. Fruit were cut in half and the seeds and
locules were discarded prior to freezing the pericarp."

/note="Vector: pBlueScript SK(-); Site_1: EcoR1; Site_2:
/note="Vector: pGlueScript SK(-); Site_1: EcoR1; Site_2:
xhol; supplier: Giovannoni; Fruit were tagged at the
breaker stage (first sign of lycopene accumulation on the
blossom end of the fruit) and harvested 7 days
post-breaker (fully red-ripe), 10 days post breaker, and
20 days post-breaker (over-ripe). 20 day fruit which
showed external or internal signs of pathogenesis were
discarded. Fruit were cut in half and the seeds and
locules were discarded prior to freezing the pericarp."

           Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DB
